**DXA** | **Spine** | **Proximal Femur** | **Total Body** | **Wrist**

**Important**: Indicate whether the following indications apply to your patients (please tick)

- **MBS Item #12306**: For confirmation of a presumptive diagnosis of low bone mineral density made on the basis of 1 or more fractures occurring after minimal trauma; or for monitoring of low bone mineral density proven by bone densitometry at least 12 months previously. 1 service per 24 months

- **MBS Item #12312**: For diagnosis and monitoring of bone loss associated with one or more of: prolonged glucocorticoid therapy; excess glucocorticoid secretion; male hypogonadism; female hypogonadism lasting more than 6 months before age 45. 1 service per 12 months

- **MBS Item #12315**: For diagnosis and monitoring of bone loss associated with 1 or more of: primary hyperparathyroidism; chronic liver disease; chronic renal disease; proven malabsorptive disorders; rheumatoid arthritis; thyroxine excess. 1 service per 24 months

- **MBS Item #12321**: For measurement 12 months following a significant change in therapy for established low bone mineral density, or presumptive low bone density on the basis of 1 or more fractures occurring after minimal trauma. 1 service per 12 months

- **MBS Item #12323**: Age > 70 years

---

**Director**: Professor Peter Ebeling, Chair of Medicine, Head of Endocrinology

**Bone Densitometrist**: Sue Harvey

**Phone**: 8395 8246 / 8119 Fax: 8395 8258
